Germany

TRIMET ALUMINIUM AG

TRIMET ALUMINIUM AG, Germany's largest aluminium producer with an international marketing network.

Trimet Marketdata Content Pool

Challenge

It was required to provide iOS software which would allow:

- watching the prices for metals made by TRIMET in real time (aluminum, copper etc.);
- watching changes in the market of metals for a certain period (1,3,6 months);
- learning TRIMET news;
- having reference information about TRIMET group companies;
- having fast access to reference information of this subject.

Solution

We have developed a software package which allows watching the market of non-ferrous metals, informing the clients on news of the company and providing reference information with the help of iPhone or iPad. Ability to obtain actual data helps to save time of clients on search and the analysis of the prices in the market of non-ferrous metals.
