ThyssenKrupp AG

ThyssenKrupp AG, Germany. At ThyssenKrupp 170,000 employees in around 80 countries work to develop solutions for sustainable progress in material and technologies.

ThyssenKrupp Content and Messaging System

Challenge

The concern wanted to provide the software for their PR department. Application tasks:

- look through documents on policy of the company;

- search of necessary contacts (intra corporate and external);

- Ciphered Instant Messaging in public relations department.

Solution

The software product for iPad has been developed which allows:

- sending Instant Messages according to the XMPP protocol through ejabberd;

- looking through documents which are stored in CMS system;

-looking through lists of contacts (on categories or all at once);

- sending email from own device.

Technology used

Apache Http server

Cocoa Touch API, UIKit framework

WordPress CMS

Ejabberd
